WEB DEVELOPER

Ladera Ranch, CA, 92694

RECENT PROJECTS

getDevJob(you) - 2018 [Live](#) | [GitHub](#)

An aggregate job site designed for people specializing in Web Development.

- Used **React** to create components styled with **Materialize.css**.
- Accessed **Google APIs** to provide relevant data for job postings such as estimated traffic times and a street view of the business.
- Used **Redux** to save a continuous theme based off different popular text editor color schemes
- Additional Technology : **HTML5**, **CSS3**, **JavaScript**, **PHP**, and **Axios**

Student Grade Table - 2018 [GitHub](#)

A grade table that allow teachers to enter, edit, and delete student grades. Students are able to see their current report card and request an emailed copy.

- Used **HTML5**, heavily styled with **Bootstrap3** to create a modern an easy to use experience themed off my .
- **JavaScript** and **jQuery** provide the functionality of the table and prompts to direct the user.
- Database is setup using **MySQL**, **PHP** queries allow you to sort students and classes alphabetically, view an individual student's class list, and see the list of students in a course.

Steady Eats - 2018 [GitHub](#)

An app to provide nutritional information on food items and where to find them around you.

- Used **HTML5** styled with **CSS** and **Materialize.css** to create a responsive design.
- Combined **Nutrition UI**, **Google Places** and **Directions**, and **Yelp** API's to provide relevant data to users.

WORK EXPERIENCE

Online Content Manager, Flash Mafia , LLC; Irvine, California — 2014-2016.

- Formatted data to be easily searchable in our company database. Improved post visibility by adding geolocation data and keywords to boost SEO score.

- Bootstrap3
- Materialize.css
- Agile
- Git

EXPERIENCED

- PHP
- MySQL
- Redux
- Firebase
- Google APIs
- JS OOP
- Mobile Responsive Design

HOBBIES

I enjoy building and painting highly detailed fantasy themed models. I have recently delved into airbrushing to improve efficiency and provide smooth color transitions.
